

- Start with personal branding at first. Your trying to establish an audience first. Post about yourself and what you do
- Do look for a good .com domain name with something that you can live with, think tattoo.
- Use a decent hosting site that does monthly payments, and low intro rate. Trust me you will need this while starting out
- Do some sort of research about what you want to write about. Not necessarily niche down, but research, write and then niche further if needed.
- Use some form of fintech type of account for your payments and invoices. Examples are Revolut, Lili, Found
- Keep a record of taxes, business licenses, invoices for services, etc. A lot can be deducted based upon if set up a llc or any corporation.
- Invest in a portable hard drive, maybe two. One for backups, or files for your business, etc.
- Remain open minded and don't give up!
- Keep going, need a pep talk? Dm me on social media. I love to dish out some positivity!!
